Loqu8 to Join SharePoint 2010 SocialFest

Developing Enterprise 2.0 Application for Microsoft SharePoint 2010 Platform

MOUNTAIN VIEW, Calif. – Loqu8 has been invited to the first SharePoint 2010 SocialFest at Microsoft's Silicon Valley Campus during the week of January 25, 2010.

“Loqu8 is excited about this opportunity to compete with the most innovative Enterprise 2.0 companies at SocialFest,” announced Dr. Tim Uy, President and CEO of Loqu8. “This event will give us the opportunity to integrate our iNtution knowledge management engine with Microsoft's SharePoint 2010 to provide instant access to information through a pop-up window.”

Loqu8 Prelude: The Power of Instant Information

Last year's version of Prelude made traditional command line search obsolete by delivering instant visual search to a wide variety of applications, include websites and Microsoft Office. The latest iteration of Prelude will integrate support for enterprise collaboration platforms. No more typing or copy-and-paste keystroke maneuvers. By harnessing the power of SharePoint 2010, Microsoft's newest business collaboration platform for the enterprise and the web, Prelude delivers information instantly, in context and at the right time.

Augmented Learning for Enterprises

Loqu8's on-demand learning model is the culmination of years of research at Caltech and Stanford University in cognitive science and information processing. Touch the screen or point with a mouse to display key information: web search, language translation, images and speech. Powered by Loqu8's iNtution™ engine, Prelude empowers users with the information to learn quickly, work efficiently and make timely decisions. Suddenly every user becomes a learner. That's the power of Loqu8's augmented learning technology.

About Loqu8

Loqu8 is a leader in augmented learning software with over 13,000 users in 22 countries. This user-guided, on-demand learning model is the result of years of research at Stanford University in cognitive science and information processing. The company's innovative **iNtuition™** information management engine uses ultra-fast LiveScan technologies to display information in a pop-up window—all in a fraction of a second.

Loqu8, a privately-held corporation with headquarters in Silicon Valley, is a member of Microsoft's BizSpark Program and an early-adopter of Windows 7 and Windows Server 2008 R2. For more information, visit www.loqu8.com.
